COLLEGE: Mazharul uloom college[Autonomous] /Thiruvalluvar
UNIVERSITY

PROJECT TITLE

Digital portfolio

1. A digital portfolio is an online collection of work and achievements.

2. It showcases skills, projects, and experiences.

3. Helps in presenting yourself professionally.

4. Useful for academic, career, and personal growth.

5. Makes it easy to share work with others anytime

AGENDA

1. Problem Statement
2. Project Overview
3. End Users
4. Tools and Technologies
5. Portfolio design and Layout
6. Features and Functionality
7. Results and Screenshots
8. Conclusion
9. Github Link

PROBLEM STATEMENT

1. A problem statement defines the issue clearly.

2. It explains why the problem exists.

3. Identifies who is affected by the problem.

4. Shows the impact of the problem.

5. Helps in finding the right solution

PROJECT   OVERVIEW

1. Summarizes the main idea of the project.

2. Explains the purpose and objectives.

3. Highlights the methods or tools used.

4. Shows expected outcomes or results.

5. Provides a clear understanding of the project

WHO ARE THE END USERS?

1. End users are the people who actually use a product or system.

2. They interact directly with the software, application, or service.

3. Their needs and preferences guide design and functionality.

4. Can be individuals, groups, or organizations.

5. Feedback from end users helps

TOOLS AND TECHNIQUES

1. Tools are software or applications used to complete tasks.

2. Techniques are methods or processes applied to solve problems.

3. They improve accuracy and efficiency.

4. Different tools and techniques suit different project needs.

5. They support successful project development and execution
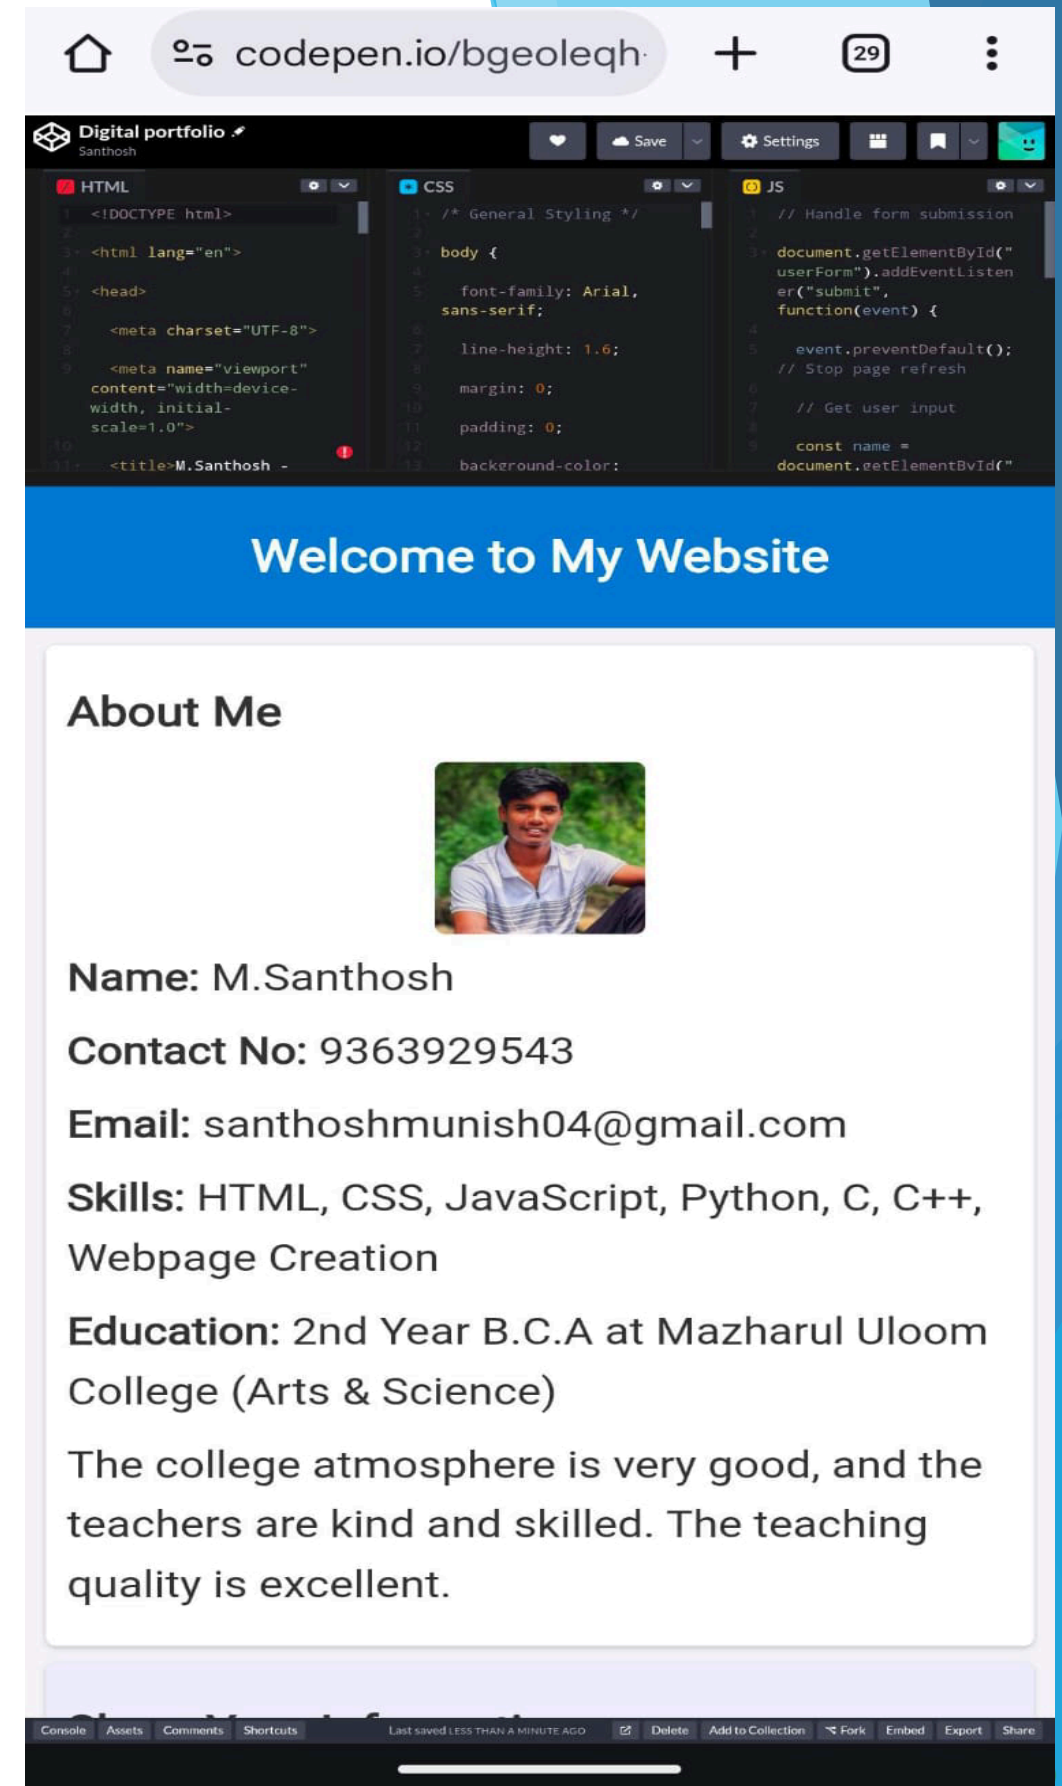

POTFOLIO DESIGN AND LAYOUT

1. A portfolio should have a clean and organized layout.

2. Use consistent fonts, colors, and styles for professionalism.

3. Highlight key projects and achievements clearly.

4. Ensure easy navigation and user-friendly structure.

5. Include visuals like images, charts, or screenshots for impact

FEATURES AND FUNCTIONALITY

1. Features are specific tools or capabilities of a project.

2. Functionality refers to how those features work.

3. They help achieve project objectives efficiently.

4. Make the project user-friendly and interactive.

5. Ensure the project meets user needs effectively

RESULTS AND SCREENSHOTS

1. Show the final output of the project.

2. Prove whether objectives were achieved.

3. Provide visual evidence of the work done.

4. Make results clear and easy to understand.

5. Help in evaluation and verification of the project

CONCLUSION

1. Summarizes the key findings of the project.

2. Confirms whether the objectives were achieved.

3. Highlights the importance and impact of the project.

4. Suggests possible improvements or future work.

5. Provides a clear ending and overall understanding of the project.
